Specialists in autism education and
early intervention for young children

About Us

Founded in 2001, Autism Early Support (formerly The Puzzle Centre) are specialists in early intervention for young children with autism or communication difficulties. Our services include:

- Our specialist day nursery in Middle Claydon, Buckinghamshire (Circle Centre) for 2 – 5 year olds
- Practical strategies and support for families through parent groups and training
- Speech and language and occupational health therapies for children aged 2-12
- Individual child assessments supporting diagnosis & EHCPs
- Teacher & practitioner training

We believe that every child with autism or other communication difficulties should be offered prompt, appropriate and high quality education, therapy and support.

Can you or someone you know volunteer for us?

If the lockdowns have left you feeling isolated and you're keen to get out and about again, volunteering with our team is great way to keep busy and meet people.

"September 2020 I started volunteering. It has been so rewarding getting alongside the children who come to the nursery and sharing their achievements. The staff team have been so encouraging and supportive. I enjoyed it so much I have now joined the permanent staff team. Having been out of paid employment for 18 years you never know where volunteering will take you!"

Louise – Circle Centre Nursery volunteer

Ways you can get involved...

- Work directly with the children in our nursery (alongside our team of experts)
- Help at our fundraising events
- Deliver our information to your community
- Through your own company
- By sharing your skills e.g. digital marketing or administration support
- Make communication resources for the young children we work with
- Support our school holiday programmes
- Regular gardening at our nursery
